Step 3: After that should be 4 "Twisted pairs" one should be in arrangement A and other in B.

Step 4: Once the order is correct, bunch them Together in a fine.
The difficult aspect is placing these into the RJ 45 plug without messing up the Order.

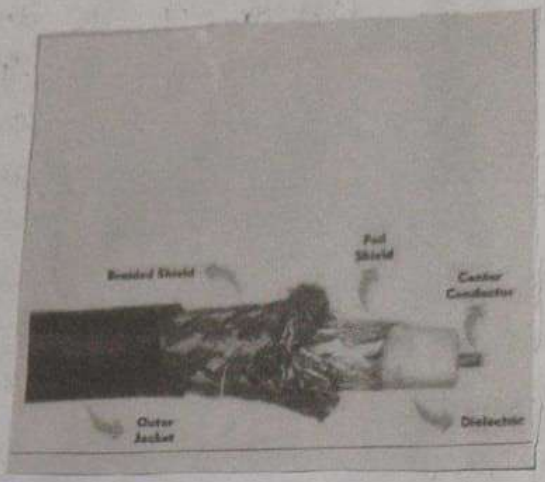

Step 5: Next, push the cable in;
The notch of the cable sheilding and if it isn't that means that you stipped it Too much.

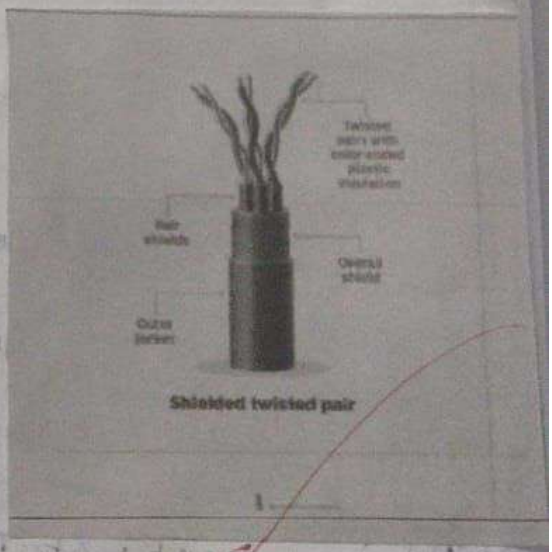

Step 6: Insert into the crimping tool and push down It should be shaped correctly.

Step 7: Lastly, repeat for the other end using diagram B.
To test it, plug it in, attempt to connect two devices directly.

Result:

Thus, different Types of network Cables are Studied.

Braided Shield
Foil Shield
Center Conductor
Outer Jacket
Dielectric

Foil shields
Overall shield
Outer jacket
Shielded twisted pair

16/7/20

Ex:2 STUDY OF DIFFERENT TYPES OF NETWORK CABLES

Aim: To Study and understand different Types of network cable To make your own ethernet cross over cable/ Straight cable.

a. understand different Types of network cable

1) unsheilded Twisted pair (UTP) cable
2) shielded Twisted pair (STP)
3) Coaxial Cable
4) Fibre optic cable

1) UTP

Category	Max Data Transmission	Advantage/ Disadvantage	Applicati
Category 3	10bps	Cheaper in cost Easy To install As they have a smaller over all dia meter	10Base-T ethernet
Category 5	upto 100bps		Fast ethernet Gigabit Ethern
Category 5e	1bps	More prone to EMI and noise	Fast Ethe Gigabit ethern
